**TOBACCO
MARKET
REVIEW**

1971 Crop

(1971-72 Season)

U.S. DEPARTMENT OF AGRICULTURE
AGRICULTURAL MARKETING SERVICE
TOBACCO DIVISION
WASHINGTON, D.C. 20250

MAY 1972

BRIEF OF CLASSIFICATION

Type 21: Virginia fire-cured; produced in the Piedmont and mountain sections of Virginia.

Type 22: Eastern District fire-cured; produced in a section east of the Tennessee River, in southern Kentucky and northern Tennessee.

Type 23: Western District fire-cured; produced in a section between the Tennessee, Ohio, and Mississippi Rivers in western Kentucky and north-western Tennessee.

Type 35: One Sucker; produced in north-central Tennessee and south-central Kentucky.

Type 36: Green River; produced in the northern part of Kentucky in the territory adjacent to Owensboro and Henderson.

Type 37: Virginia sun-cured; produced in central Virginia, north of the James River.

KEY TO STANDARD GRADE MARKS FOR FIRE-CURED AND DARK AIR-CURED TOBACCO

Group	Quality	Color	Length 1/
A-Wrappers	1-Choice	L-Light brown	47-Over 28" 3/
B-Heavy leaf	2-Fine	F-Medium brown	46-24" to 28" 3/
C-Thin leaf	3-Good	VF-Greenish medium brown 4/ 5/	45-20" to 24"
T-Tips 2/	4-Fair	R-Reddish brown 2/	44-16" to 20"
X-Lugs	5-Low	D-Dark Brown	43-Under 16" 4/
N-Nondescript		K-Variegated 7/	W-Unsafe order 6/
S-Scrap		M-Mixed	U-Unsound 6/
		G-Green

1 Grade of Scrap

S

- 1/ No lengths in Tips, Lugs, and Nondescript (except in Type 21, Length 45 is authorized in X3M, X4M, X5M, X3G, X4G, and X5G if over 20").
- 2/ Dark air-cured only.
- 3/ Except in Type 37.
- 4/ Fire-cured only.
- 5/ Except in Type 21.
- 6/ Unsafe order - Sound but containing excessive moisture, likely to damage unless precautions are taken.
- 7/ Unsound - Damaged under 20 percent.
- 7/ Type 21 only.

U. S. DEPARTMENT OF AGRICULTURE

REVIEW OF THE FIRE-CURED AND DARK AIR-CURED MARKETS ---1971-72 SEASON

FIRE-CURED average set a new record.
Most grade averages reached all-time highs
Quality off except in Virginia
Sales volume up; crop's value second highest

The average price paid for the 1971 Fire-cured crop (Types 21-23 combined) reached an all-time high for the second consecutive year. Quality was not as good in the Kentucky-Tennessee area (Types 22-23), but showed improvement in Virginia (Type 21). Marketings contained less green and mixed and more of the desirable medium and dark brown. Grade averages in all Types reached record levels in most cases. Fair to good heavy leaf, low to fair lugs, and fair thin leaf made up most of the sales. The value of the combined Fire-cured crop was a near record -- second only to the 1946 record return established when a huge 107 million pound crop was sold. Country sales (tobacco not sold at auction) in the Eastern District (Type 22) have been on the upturn in recent years and accounted for about 30 percent of the 1971 Type 22 sales.

The Agricultural Marketing Service (formerly the Consumer and Marketing Service) of the U.S. Department of Agriculture reported a net average price of \$59.96 per hundred pounds paid for the 1971 Fire-cured crop (Types 21-23 combined) -- a new record, topping the old record of \$54.03 set last season, by \$5.93. Net sales for the Fire-cured crop (including 9.2 million pounds of country sales) totaled 43.1 million -- up about 6.1 million from a year ago and the largest volume in six years. The crop was valued at \$25.9 million -- second only to the record set 26 years ago when \$28.4 million was returned from sales of 107 million pounds.

DARK AIR-CURED average second highest
Most grade averages gained
Quality better in some areas
Sales volume and crop's value up a little

Quality of the 1971 Dark Air-cured and Sun-cured crop improved in some geographical areas but was not as good in others. In northern Kentucky (Type 36), the quality was better than a year ago but declined in south central Kentucky and Tennessee (Type 35). Virginia Sun-cured (Type 37) compared favorably with the preceding crop but about 15 percent of the offerings suffered from mold damage. The overall average price paid for the 1971 crop (Types 35-37 combined) was the second highest on record. Most individual grades gained over 1970 levels. The color trend was to more medium brown and less mixed and green. Low to fair lugs, fair to good heavy leaf, fair thin leaf, and nondescript made up the bulk of the sales. Sales volume and the value of the 1971 crop were up a little from last year's light volume and return.

The average price paid for the 1971 crop of Dark Air-cured tobacco (Types 35-37 combined) was \$47.59 per hundred pounds -- the second highest ever attained and just a few cents under the all-time record of \$47.72 set in 1968. Net sales (including country sales of 387,186 pounds) totaled 16.7 million pounds -- a little above the 1970 sales of 16.4 million. The crop was valued at \$7.9 million -- a small increase over the 1970 return of \$7.6 million.

35-37	16,656	7,926	47.59	1,683	10.1	35-37	16,426	7,638	46.50	1,046	6.4	35-37	16,426

The average loan level of the 1971 Fire-cured crop (Types 21-23) was 48.5 cents per pound, compared to 46.6 cents for the 1970 crop. For the 1971 Dark Air-cured and Suncured crops (Types 35-37) the level was 43.1 cents compared to 41.4 cents in the preceding season. The 1972 Fire-cured crop will be supported at an average of 50.8 cents and the Dark Air and Sun-cured crops at 45.2 cents per pound -- an increase of about 4.8 percent over the 1971 levels for all Types.

Ranges for the Types are below:

	1971 Crop		1970 Crop	
	Cents per pound		Cents per pound	
Fire-cured				
21	23 to 70		22 to 68	
22	30 to 69		28 to 67	
23	30 to 69		28 to 67	
Dark Air-cured				
35	30 to 60		28 to 58	
36	30 to 60		28 to 58	
37	19 to 65		17 to 64	

Deliveries of the 1971 Fire-cured crop to the Associations under the U.S. Government loan program totaled only 96,383 pounds or 0.2 percent of the net sales -- the lowest in history. About 153,000 pounds or 0.4 percent of the 1970 crop went under loan. Dark Air-cured and Sun-cured deliveries were 1.7 million pounds -- about 10.1 percent of the net sales. In 1970 about 1.0 million pounds or 6.4 percent of the crop went to the Coops. See table 17 on page 56 for more details.

Opening and closing dates. The 1971 season for the 17 operating markets opened on November 30, 1971 in Virginia and ended on March 7, 1972 with a clean-up sale at Clarksville, Tennessee. See table 1 on page 7 for individual market openings and closings.

Data for Types were as follows:

Type	Number of markets	Opening date	Closing date
21	3	Nov. 30, 1971	Feb. 10, 1972
22	3	Jan. 11, 1972	Mar. 7, 1972
23	2	Jan. 10, 1972	Feb. 18, 1972
35	5	Dec. 3, 1971	Jan. 26, 1972
36	3	Dec. 1, 1971	Jan. 19, 1972
37	1	Dec. 7, 1971	Jan. 28, 1972
Total	17	Nov. 30, 1971	Mar. 7, 1972

Inspection and market news. Federal inspection and market news services, in effect on all markets, provide the grower with information as to the quality of his tobacco according to Federal grade and the current price at which such grade is selling. (All baskets of tobacco are inspected and graded by Government officials prior to sales and the price reports are made available to the grower on the auction floor). The program operated under the authority of the Tobacco Inspection Act (approved on August 23, 1935) offers growers free and mandatory inspection on auction markets designated by the Secretary of Agriculture for such service, following favorable referendums of growers selling on such markets.

Marketing quotas. The 1972 crop of Fire-cured and Dark Air-cured tobacco will be price supported as a result of the favorable referendum held February 16-20, 1970, when voters approved quotas for three years. Virginia Sun-cured (Type 37) voters approved quotas for the 1972 and 1973 crops in a referendum held February 22-26, 1971

Acreage allotments are shown below:

Type	1972 Crop	1971 Crop	1970 Crop
21	12,203	12,612	11,685
22	30,033	27,298	27,170
23			
35	11,312	11,404	11,304
36			
37	2,100	2,218	2,361

The 1972 allotments for individual farms will be about the same as in 1971 except in Types 22-23 (Kentucky-Tennessee fire-cured Types) where allotments will average about 10 percent more.

1/ Footnote for the table on page 5

All known marketings by producers. This figure may vary slightly from estimates of the Crop Reporting Board, SRS, as the Board takes into consideration all tobacco grown, whether or not sold, and regardless of place of sale. (Types 22, 23 and 35 in this table include country sales)

Continued.-

Table 15.- Season average prices per 100 pounds of tobacco, by types, in the fire-cured and dark air-cured areas, volume of sales by grades, and schedule of loan rates.

1/ Averages based on auction sales, including Association deliveries at advance prices.

2/ For key to standard grade marks see brief of classification on page 2.

3/ Commodity Credit Corporation loans made available to growers through cooperative associations as follows:

Type 21: Dark Tobacco Sales Cooperative, Farmville, Va.

Type 22: Eastern Dark-fired Tobacco Growers' Association, Springfield, Tenn.

Type 23: Western Dark-fired Tobacco Growers' Association, Murray, Ky.

(Eastern Dark-fired Tobacco Growers' Association, Springfield, Tenn.

Type 35: (Western Dark-fired Tobacco Growers' Association, Murray, Ky.

Type 36: Stemming District Tobacco Association, Henderson, Ky.

Type 37: Sun-cured Tobacco Marketing Cooperative, Inc., Richmond, Va.

Note: Tobacco grades "U"(unsound), "DAM"(damaged), NK, No-G(no grade), botched, nested, or off-type was not accepted. Tobacco graded as follows was accepted at 20 percent below the otherwise applicable loan rate; "W"(unsafe keeping order), in Types 21,22,35 and 36. BH (bigheads) in Types 35 and 36, and BL(broadleaf) in Type 35.

4/ Data on pounds show only the approximate quantity of tobacco contained in each grade and are not an accurate record of sales; additional miscellaneous sales, including damaged, off-type, unsafe order, unsound and etc. were as follows:

Crop	Type 21 Pounds	Type 22 Pounds	Type 23 Pounds	Type 35 Pounds	Type 36 Pounds	Type 37 Pounds
1971	587,159	400,177	427,744	1,652,366	595,680	170,071
1970	534,136	352,870	244,082	1,525,341	605,709	154,029

1/ Prior to 1960, price support legislation provided that loan levels be the higher of (1) minimum levels announced before planting time or (2) 90 percent of parity as of the beginning of the marketing year. However, loans on (a) fire-cured (b) dark air and sun-cured were not based on their parities, but were set at 75 and 66-2/3 percent respectively of the burley support(marketing year beginning Oct. 1): except that, beginning with the 1958 crop, loans should not exceed the 1957 levels, unless 90 percent of their respective parities exceeded such levels. Legislation enacted in February, 1960, provided that the levels for the 1960 crop be the same as for the 1959 crop.

2/ Minimum level announced before planting time--slightly higher than 90 percent of parity as of Oct. 1.

3/ Beginning with the 1958 crop, parities were separated for type 21 and types 22-23

Table 17.-Fire-cured and dark air-cured tobacco received under Government loan program, and percentage of net sales. 1/

Table 18.-Average prices per 100 pounds of tobacco, by weeks, on representative grades, for the Virginia fire-cured markets, and season averages. 1/
